

Following elements are not discussed in the class:

1.<blockquote> element:

The <blockquote> tag specifies a section that is quoted from another source.

Browsers usually indent <blockquote> elements.

The text becomes centered and is shown in the example html program

2.<abbr> abbreviation element:

The <abbr> tag defines an abbreviation or an acronym, like "Mr.", "Dec.", "ASAP", "ATM".

When cursor is moved on to the term the abbreviation is shown as

3.<bdo> bi-directional override element:

bdo stands for Bi-Directional Override.

The <bdo> tag is used to override the current text direction. The direction of the text reverses.

4.<caption> element:

The <caption> tag defines a table caption.

The <caption> tag must be inserted immediately after the <table> tag. we can specify only one caption per table.

By default, a table caption will be center-aligned above a table. However, the CSS properties text-align and caption-side can be used to align and place the caption.

5.<col> element:

The <col> tag specifies column properties for each column within a <colgroup> element.

The <col> tag is useful for applying styles to entire columns, instead of repeating the styles for each cell, for each row.

6.<s> element:

The <s> tag specifies text that is no longer correct, accurate or relevant.

The <s> tag should not be used to define replaced or deleted text, use the tag to define replaced or deleted text.
